UNIVERSITY OF TWENTE.

ABSTRACT

This is the abstract (or remove for no abstract). Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aeque doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguique possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo a nobis philosophia defensa et.

1. THIS IS THE FIRST SECTION

Your content goes here. This example document shows some of the possibilities of Typst and how to work with it below.

1.1. This is a subsection

- You can make a list like this.
- And do a citation like this [1]
  - You can also cite like this [1]
  - And M. M. Surname [1] told me how to do an inline citation

1.2. List enumeration

1. List numbering is like one expects how to create a list with numbers.
2. Another number
   - Or no number
     - Or no number

1.3. Two-column layouts!

1.3.1. Explanation

Say the magic words (`#columns(2, [content])`) and thy columns will multiply!

Here is some filler text to make the two-column layout appear nicer:

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aeque doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut.

1.4. Figure

A figure can be added like this:

Figure 1: This is part of the University of Twente

And referenced like Figure 1.

2. MY TABLES

Look in Table 1 and Table 2 for two amazing tables. Change the table styling above.

Letter	Dutch Number	#
A	Honderdtwintig	120
B	Tweeduizend	2000
C	Vijf	5
D	Twintigduizendvijfhonderdendrie	20503

Table 1: One table

Responden @		♂	♀	A
A	Email	22	2	Someone
B	Domain	16	5	Sometwo
C	Username	16	4	Somethree

Table 2: Another table

3. PROGRAMMING TIME!

Writing code can be done without problems!

Just open a new code block like this:

Python

```python
def sum(a, b):
    return (a + b)

a = int(input('Enter 1st number: '))
b = int(input('Enter 2nd number: '))

print(f'Sum of {a} and {b} is {sum(a, b)}')
```

3.1. A new programming language?

You can introduce a custom syntax highlighter with `.sublime-syntax`. For example, syntax highlighting for the Hedy programming language in Dutch!

Syntax in level 3:

Hedy

```
keuzes is steen, papier, schaar
print Ik wil: keuzes kies willekeurig
```

Syntax in level 16:

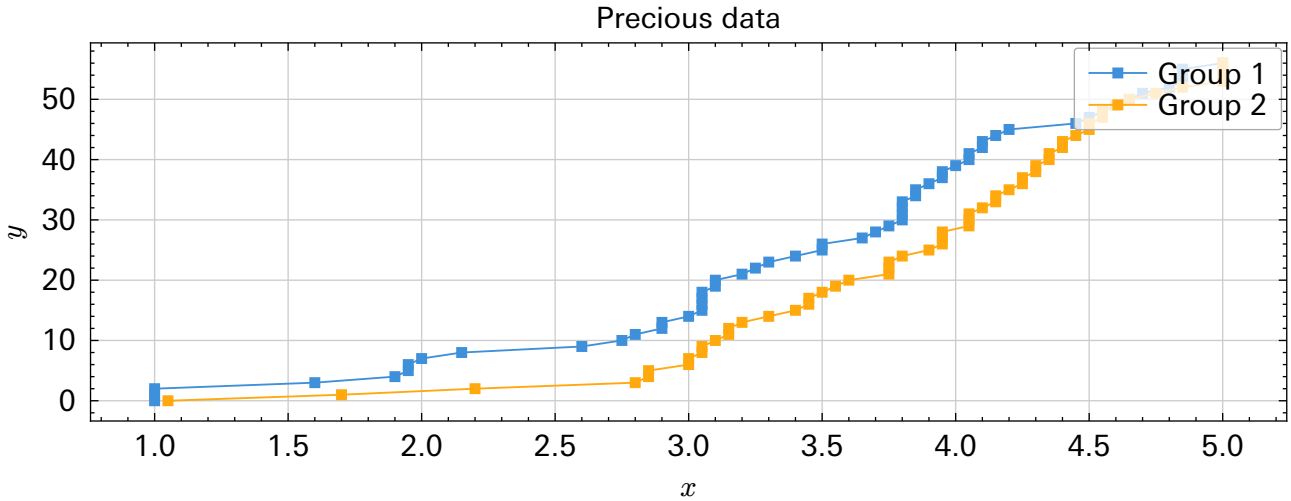
Hedy

```
keuzes = ['steen', 'papier', 'schaar']
print "Ik wil: " keuzes[random]
```

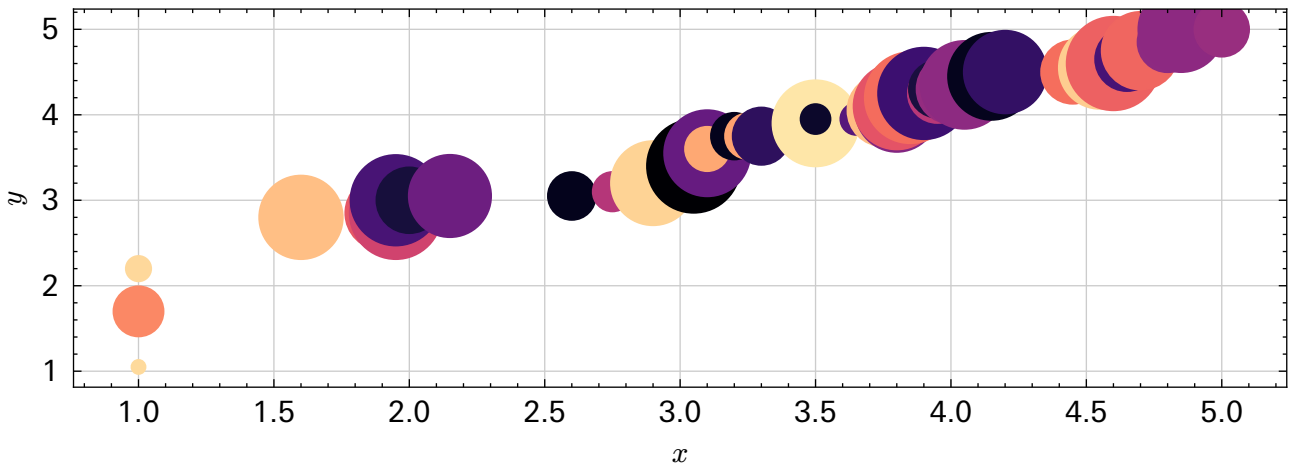
4. GRAPHS

You can find more about graphs here: https://typst.app/universe/package/lilaq/

4.1. Graphs! Line Chart.



4.2. Graphs! Scatter.



5. HOW TO DO MATHS

Mathematics is possible as well:

$$A = \pi r^2$$

$$\text{area} = \pi \cdot \text{radius}^2$$

$$\mathcal{A} := \{x \in \mathbb{R} \mid x \text{ is natural}\}$$

$$5 < 17$$
